DECKING TOOL, the ultimate all-in-one pre-drilling countersink tool!
Purpose built for decking and woodworking applications, especially where stainless steel screws are used. The single drilling countersinking action of the tool allows for an easier, quicker and more professional looking finish.

HSS Parabolic Bits
for **FASTER** drilling

SMART-BIT®

Why SMART-BIT®?

SMART-BIT®, the first pre-drilling and countersinking tool specifically designed for deck builders

Decks have undergone an evolution in recent years, from being part of the backyard to part of a home's primary living space. Along with this change has come the expanded use of preferred decking materials like composites and hardwoods. Stainless steel deck screws, long recognized as the fastener of choice for high-end decks, have also witnessed expanded use. Stainless steel, however, is softer than hardened steel and often requires pre-drilling with preferred decking materials. In the past, pre-drilling was time consuming and laborious. But with the introduction of the original SMART-BIT®, pre-drilling and countersinking could be done in one step, with one tool, more quickly and more easily than ever before. Just match SMART-BIT® to your stainless steel deck screw size and the once difficult task of pre-drilling an entire deck becomes quick and easy. That's smart!

And now, SMART-BIT® is even smarter! The new SMART-BIT® has POWERBOLIC® drill bits with special fluting that cuts through decking more than twice as fast as standard wood bits. Plus, the bits are replaceable! For deck builders working with composites, SMART-BIT® offers an additional benefit -- it eliminates mushrooming (the formation of small mounds of waste material near the screw hole surface). SMART-BIT® is perfect for the installation of composite and hardwood decks, and is also great for general woodworking applications.

Even Pilot Clutch System

Part No. TZ AC11 : The Even Pilot 1/4"

A unique accessory that converts any electric drill into a powerful "screw gun". Easy depth adjustment enables precise countersinking and counter boring of screws in drywall particleboard & plywood. Quick & easy change without re-chucking. Max RPM 2500.

Part No. TZ AC11A The Even Pilot Plus 1/4"

The ideal for clutch screw driving.
Can also be used with self-drilling screws on corrugated steel materials.
Adjustable depth stop.
Use with magnetic nut-driver in sizes of 1/4" & 5/16".
Free rotating ring to hold & guide screw in accurately.
Automatic clutch release enables precise countersinking of screws in drywall, particle board and plywood.

Part No. TZ AC12 Drill & Drive Coupler

The accessory that converts any drilling and screwing work to be more efficient and pleasant.
Quick release enables an easy and fast way to change tool from drilling to screwing.
Included our unique "Drill & Drive Bits"
PH/PZ#1 x 2.5mm Drill, PH/PZ#2 x 3mm Drill &
PH/PZ#3 x 4mm Drill, 6.35mm (1/4") Quick release chuck
9.5mm (3/8") Hex shank fits most power drills.
